

Sustainability Policy

Thai Reinsurance Public Company Limited and its subsidiaries have the prime business objectives to produce favorable returns and create value for insurance industry in parallel with social and environmental development under the sustainable development guideline so as to promote social stability, which will lead to organizational sustainability in the years ahead. Details of the sustainability policy are as follows:

1. Operate business under the corporate governance principles with attention paid to the impacts on stakeholders.
2. Formulate business operation strategies and models towards sustainability by taking into account business environment, change factors, opportunities and threats that could affect the achievement of the Company's main goals and objectives, as well as factors that could impact stakeholders.
3. Promote the creation of innovation and technology for business operation in a bid to generate business value, enhance competitiveness and respond to stakeholder demands, while taking account of business ethics and long-term social and environmental impacts, to ultimately attain sustainable growth.
4. Monitor and ensure an efficient and effective allocation and utilization of resources by paying regard to the impacts of resource utilization and resource development across the value chain and the changes of internal and external factors.
5. Disclose reliable information on sustainability performance, including both financial and non-financial information, to ensure uninterrupted development.
